WHAT THEY'LL BUILD AGES 8–12

REAL MECHANISMS, BUILT BY HAND

SAT OCT 24 | 1:00–3:00 PM | $20 PER STUDENT | AGES 8–12

Children explore **mechanics and the different types of motion**, then build a working model of their own during a hands-on session at our table.

1. **Gears and gear trains**
   How a small turn becomes a bigger, slower or faster one.
2. **Types of motion**
   Rotary to linear — cams and linkages turn a spin into an up-and-down movement.
3. **Structures that hold**
   Frames, beams and pivots that keep a moving machine steady.

PICK A SESSION

1:00	1:30	2:00	2:30

Each session runs about 25 minutes · 4 students per kit, so everyone gets hands on.

Payment at the booth or by e-transfer to **info@brickandmotorlabs.com**. **Spaces are limited** — please register ahead.

Want the kit for home?
