

Blix Build-A-Machine

Age 5+ | 70+ Parts | $38 CAD

Build-A-Machine brings the world of machines to life through 7 hands-on builds inspired by real mechanical systems. As your kids assemble and explore each model, they discover how machines work while developing creativity, problem-solving, and critical thinking skills.

Full details, video and kits: brickandmotorlabs.com/builds/build-a-machine.html

What You'll Learn

Build-A-Machine introduces your children to concepts of motion, rack and pinion mechanics, and real-life mechanical systems. As they assemble each model and test what it does, they practise

hands-on problem solving and see the same mechanisms at work in the machines around them.

What's In The Box

- 70+ Premium Blix Building Parts
- Step-By-Step Instruction Manual
- Wheels
- Powered Screw

Build Models

7 in 1 · 70+ parts · ages 5+

Rack & Pinion Lift

A toothed rack meshes with a round pinion gear, so turning the gear drives the rack in a straight line and lifts what it carries.

Scissor Lift

Crossed legs joined at their centres form an X, and pushing the ends together raises the platform straight up.

Cam & Follower

A shaped cam on an axle turns rotation into the follower's up-and-down movement, giving one timed push per turn.

Build-A-Machine is a 7-in-1 set: these are the three models named on the box, and the step-by-step instruction manual carries the other four builds. The set also includes wheels and a powered screw.
