

Power Screw

Age 8+ | 200+ Parts | $80 CAD

More than just a robot kit, this motorized STEM construction set lets kids build 7 working models, including a dumper truck, scissor lift, pressing machine, and more. As they build and experiment, they discover how real machines use mechanisms like power screws to convert rotational motion into lifting and pushing movements. With versatile parts that support open-ended building, the learning continues long after the included models are complete.

What You'll Learn

Power Screw introduces your children to the power screw mechanism, high torque motors, and linear motion. Discover how real machines use mechanisms to convert rotational motion into lifting and pushing movements.

What's In The Box

- 200+ Premium Blix Building Parts
- Step-By-Step Instruction Manual
- 3V Battery Box
- DC Motor

Build Models

7 motorized models · power-screw mechanism · ages 8+

Basic Car

A motorized base car to build and drive.

Pressing Machine

A power-screw pressing machine.

Dumper Truck

A dumper truck with a tilting bed.

Scissor Lift

A scissor lift that rises with a power screw.

Scissor Gate

A scissor gate that opens with a power screw.

Convertible Car

A convertible car.

Tractor

A power-screw tractor.
