What You'll Learn

Queaky Charge introduces children to the principle of a closed circuit, resistance, and current flow, the foundational concepts of electronics.

What's In The Box

- Queaky Charge unit with rechargeable battery
- Building parts for musical instrument creation

Build Models

Musical experiment toy · rechargeable

Play Music with Anything

Queaky works on a closed circuit: when it senses a complete loop it makes a sound, and the tone changes with the resistance in the circuit. Play with leaves, a drop of water on string, or even just your fingers.

Test Materials

Use different materials in the circuit and hear how resistance changes the tone — real circuit science through sound.

Prank & Play

Use it to prank friends around you or just cure some boredom — endless creative combinations.

Model 2: Prank Device

Build a fun prank device that surprises friends with playful sounds.

Stay in the loop
