

BrickAndMotorLabs — schools, camps & groups

Blix hands-on STEM & robotics kits · ages 3+ · Ottawa, ON · we travel to you

Every child **builds**. We bring the workshop.

Kits, parts, illustrated manuals, spare parts and a builder to run the session arrive in your classroom, camp or group space. No screens, no tablets, no accounts. Children leave with something they made and moving parts they understand.

Request a date

Build session, one day

A 90 minute build in your space — gears, cams, linkages, motors. One build team per kit, so every child has hands on the parts.

Build club, over a term

The same kits, rebuilt and extended week after week. Each session adds a mechanism: gear ratio, cam, crank and slider, pulley, power screw.

Camp or community build day

A table of kits children rotate through, with a scan-to-order card for each so families can buy the exact kit their child built.

WHAT WE BRING

- **Every kit and part** for the session, sorted into build-team trays
- **Illustrated build manuals**, one per build team
- **A spare-parts bin** and spare axles, so a dropped piece never stops a build
- **Build mats** and a takeaway kit-card set for parents
- We pack up and leave the space as we found it

AGE FIT

- **Age 3+** and **5+** kits: one build, big parts, a finished model in one sitting
- **Age 8+** kits: 61 to 340 parts, motorized and remote-controlled builds

HOW A SESSION RUNS

- Maximum **4 students per kit** — everyone builds, nobody watches
- We set the trays out before the group arrives
- Build, test, then a rebuild challenge: make it faster, higher, or carry a load
- Last ten minutes: what actually made it move, in words a child can say

TAKE-HOME KITS

- Add a kit for each build team: **\$12.78 to \$268.38** (live shop prices, 2026-10-05)
- School and camp orders are quoted by group size — tell us the count and we price it
- **Coverage:** Ottawa and the GTA, in your space. Kit orders ship Canada-wide — \$5 hand delivery in Ottawa and the GTA, Canada Post everywhere else

BOOK IT IN THREE STEPS

- 1 Scan the code (or email info@brickandmotorlabs.com) with your **date, group size and ages**.
- 2 We confirm which kits fit the group and send a price for the session and any take-home kits.
- 3 We arrive early, set the trays out, run the build, and pack up.
