

Build. Learn. Play.

15 Blix kits — every box comes with a step-by-step manual, so your child builds real machines: gears, motors and 2.4 GHz remote control. **We also run workshops** for schools & groups.

RC Megastructures

8 models

You can build: a remote-controlled giant crane, folding transporter bridge & X-Y table. Kids build it — then they drive it.

Discovering Motions

13 models

You can build: 13 real machines that move — gears, cams, levers & cranks, built step by step. The flagship for curious builders.

Amusement Park

7 models

You can build: a motorized ferris wheel plus carousel, launch coaster, mini-golf car & 3 more rides — a whole park, all gear-driven.

Crawlers

8 models

You can build: 8 walking robots — from 2 legs to 4, every single one gear-powered and ready to scurry.

Power Screw

7 models

You can build: a scissor lift that really lifts — a high-torque motor turning screw threads into real mechanical advantage.

Also in the family: Marble Run 2 · Gear Box · Forklift Power · RC Explorers · Buddy · RC Rover · Rover · Minis Bike & Ferris Wheel · Queaky Sleepy — **15 Blix kits total, all with step-by-step manuals.**

SCHOOLS · CAMPS · COMMUNITY GROUPS

We bring the workshop to you

- **Max 4 students per kit** — every child builds, no spectators
- We bring all kits, parts & step-by-step manuals — you bring the kids
- Ages 5 and up · real gears, motors & RC — hands-on, no screens
